SDG 17.4.4	Sustainability Literacy of Students

Dawood University conducted a comprehensive survey to measure sustainability literacy among its students, with 568 participants representing various departments. The survey aimed to assess students' knowledge, attitudes, and thinking related to sustainability, based on a structured scale from 1 (low) to 5 (high) in each area. Results showed encouraging awareness, with high scores in knowledge of environmental issues and sustainable practices. Attitudes reflected a strong commitment to sustainability values, and thinking scores indicated a good level of sustainable practices among students. This survey provides valuable insights into the students' readiness to contribute to sustainable development and highlights areas where further educational initiatives can strengthen their understanding and application of sustainability principles.

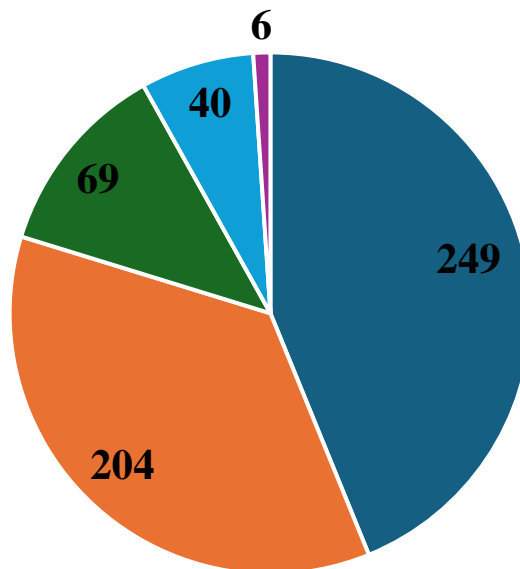

DUET helped to Change the attitude towards Sustainability

■ Strongly Agree ■ Agree ■ Neutral ■ Disagree ■ Strongly Disagree

DUET helped to think about sustainability differently

■ Strongly Agree ■ Agree ■ Neutral ■ Disagree ■ Strongly Disagree
